RE: Request for Project Review—Project 19-EM-001-Ames Dike Repair, Dodge County, Nebraska

Dear Chairman Lyman,

Dodge County and the Ames Dike District are undertaking flood related repairs which are being assisted with funding from Community Development Block Grant Emergent Threat program funds. The purpose of the project is to repair an approximate 1,000-foot levee breach which occurred on March 16, 2016 during the Platte River flood event. The proposed repair action is the reconstruction of the damaged levee to restore the flood risk reduction previously provided by the Ames Dike.

The scope of project activities will include Easement Acquisition of an estimated 5 acres to allow for levee design improvements to control seepage. The Flood Control repairs will include in-line repairs to restore the levee to pre-disaster conditions including placement of underwater fill and confining material primarily consisting of riprap and geotextile material. Random fill will be obtained from the removal of a temporary diversion dike constructed in June 2019 and from sand deposited on the surface of an adjacent farmland by the floodwaters. There will not be any excavation beyond previous ground level on the project site. Cohesive fill materials (clay) will be obtained from an approved existing sand and gravel operation in Fremont. Attached is a project description and map.

Please send your response within 30 days of the date of this notice to Northeast Nebraska Economic Development District (NENEDD), 111 South 1st Street, Norfolk, Ne 68701, acting of behalf of Dodge County. If a response is not received within 30 days of this notice we will assume you have no concerns regarding the flood control repair project for the Ames Dike in Dodge County Nebraska and we will proceed forward with the project.

Please contact NENEDD's office at 402-379-1150 extension 102 if you need additional information.
