Is a grading map attached showing existing contours, proposed excavation contours and the proposed final grade contours? YES or **NO**

Is a statement attached identifying the effect of the groundwater table of adjoining properties? YES or **NO**

Is location identified of proposed vehicle and equipment storage areas, erosion controls, including retention and sediment basins during extraction to prevent a change in the character of runoff onto adjacent land? **YES** or NO Keep terrace in tact.

It shall be the responsibility of the owner of the land which the soil is being removed to meet the following conditions:

The character of runoff from and onto adjacent land shall not be changed.

Before this permit is issued, the applicant/owner must confer with the current county highway superintendent as to what routes or roads the trucks will use and the method of maintaining the routes or roads.

There shall be no excavation closer than one hundred feet (100) of any abutting property not involved in the operation. All cuts shall be no less than four to one.

The topsoil shall be collected, stockpiled and redistributed over the exposed soil area of the operation. The soils in the excavation area shall then be stabilized, the land graded, seeded or sodded to prevent erosion and siltation.

The owner of the property from which the fill material is being removed shall be responsible for costs for any damage to county roads or bridges used for access to the site, which requires additional maintenance or repair from normal county maintenance or repair as a result of additional traffic generated.

The protection of the public health and safety shall be the responsibility of the owner of the property from which the fill material is being removed. Upon observing a problem or verifying a complaint, the Zoning Administrator may order the operation to cease until the problem is resolved.

All extraction of material within a designated floodway must conform to the Floodplain Regulations.
