Re: East Fremont_Elkhorn Township Draining Improvement Project (DR4420-0019)
Engineering Firm Recommendation

Dodge County Board Chairman Missel:

On June 23rd, 2021, representatives of the Dodge County Joint Water Management Advisory Board (JWMAB) reviewed three (3) engineering firm proposals for the East Fremont_Elkhorn Township Drainage Improvement project in the Dodge County Emergency Management office. Enclosed is a copy of the proposal tabulation sheet that lists all the engineering firms.

Based on the proposals received, it is the JWMAB proposal review committee's recommendation that the County proceed with contracting with JEO Consulting Group, Inc to complete the project. Each engineering firm that submitted a proposal was very qualified and understood the scope of work to accomplish the project.

JEO Consulting firm's experience with FEMA Hazard Mitigation Projects and their proposed cost \$739,580.00 were key factors in making the JWMAB committee's recommendation. Though FYRA engineering provided the lowest bid, the selection committee felt the proposal was incomplete, not addressing the final design phase costs. Upon Board approval to award the contract, Dodge County Emergency Management will coordinate contract documents with JEO Consulting.

If you have any questions about the enclosed, please contact me at your convenience at dodgecoema@gmail.com or 402-727-2785.

Very Respectfully,

Thomas Smith
Director
Dodge County Emergency Management
