RE: Stately Poultry, LLC Concentrated Animal Feeding Operation  
NDEQID: 112191  
Program ID: LWC 5-1103  
Subject: **Construction and Operating Permit Issued – Approval to Operate**  
S 1/2, NE 1/4, Section 15, Township 18N, Range 08E, Dodge County  
Consultant: Nutrient Advisors

Dear Mr. Camenzind:

Enclosed is your Construction and Operating Permit for the livestock confined at the above concentrated animal feeding operation. This permit is issued by the Nebraska Department of Environmental Quality (Department) in response to your application received on April 11, 2019, with an addendum received on April 8, 2019.

Please notify the Department, in writing, once construction of the dry litter barns has been completed. The Department hereby grants approval to populate the barns and begin feeding livestock immediately upon construction being completed as described in the submitted application. Department staff will conduct periodic compliance inspections of your operation.

Construction activity that disturbs a land area of one (1) acre or more must obtain coverage under the National Pollutant Discharge Elimination System (NPDES) Construction Storm Water General Permit Number NER160000, which authorizes storm water discharges from construction sites. This permit may be obtained by the operation's authorized representative, the contractor or other party responsible for the construction project. The issuance of a discharge authorization under this Construction Storm Water General Permit does not relieve the Permittee of other duties and responsibilities not authorized under this permit. Application for permit coverage can be made by accessing the following website:  
<https://ecmp.nebraska.gov/DEQ-CSW>.

The Permittee, authorized representative or an employee of the operation is required to obtain land application training within 180 days of receiving permit coverage, unless one of these persons satisfactorily completed such training within the past five (5) years. Enclosed is a list of training programs currently available that will meet this training need. You may contact Leslie Johnson at (402) 584-3818 or [leslie.johnson@unl.edu](mailto:leslie.johnson@unl.edu) to request the home study course or to ask any questions related to this training. It is your responsibility to provide the Department documentation verifying one of the above individuals has completed the training for this operation. Additional training must be completed every five (5) years.

Your large concentrated animal feeding operation is not required to obtain coverage under an NPDES Permit for Concentrated Animal Feeding Operations based on your current operation. NPDES Permit coverage of your operation may be required in the future if your operation discharges into waters of the State or if required due to statutory or regulatory changes.

The issuance of this permit does not remove your responsibility to comply with any Natural Resources District, county or local zoning regulations. This concentrated animal feeding operation shall be operated and maintained according to the approved application, this Construction and Operating Permit and the requirements in Title 130, *Livestock Waste Control Regulations*. These documents include operating and maintenance requirements, best management practices and requirements for monitoring, reporting and land application of the waste.

Read and become familiar with these documents, as you will be held responsible for your operation's compliance with these requirements. Violation of Title 130 requirements may result in fines, penalties or removal of the livestock from the operation until compliance is met. You are responsible for preventing any runoff or discharge of livestock waste to waters of the State.

If you have any questions, please contact Kevin Franzluebbbers at (402) 471-6687 or myself at (402) 471-4239.

Sincerely,

Cay Ewoldt, Supervisor  
Agriculture Section
