Agenda Item # 21 F
Date 4/8/20

Hi Rachel, I'm sorry to hear that you didn't get a response from Mrs. Spooner. I was hoping she would agree to clean the area up; it would certainly look better.

Your suggestion about reaching out to the County is a good one because this area is not in the City limits, so the County has jurisdiction. I've taken the liberty to copy Bob Missel, Chairman of the Dodge County Supervisors and Jean Andrews, County Zoning Administrator to see if they have any advice for you.

Thanks again for reaching out to me. Brian

Subject: Somers Point

Its been almost a year now since I contacted the city concerning the trees just north of the Golf Course and across from Somers Point, which ended in a letter that I sent to Marilyn Spooner asking her to consider cleaning up that area of the dead and dying trees, sorry to say there was no response from her what so ever.

As Sprina is now comina on aaain. this is even more

of an eye sore with all the wind we've been having and trash has caught in the trees. I also see it as a fire hazard both for the country club, as well as the Quonset buildings that appear to be storage for boats, campers, lawn services equipment, etc. Not to say what a fire could do for residents with breathing issues out here.

You mention I could contact you again if you could help us, so here we am. I was wondering if the County Board would have any impact on this issue. I'd appreciate any help you could give us.

Thanks. Sincerely,
Rachel Jensen
